Exam

Remark: By delivery date, any training documentation shall be subject to regular reviews and updates amending the table of content as described herein.

ⁱ One of the core values of the House of Training is pragmatism, the training it provides is therefore: practical, current, modular and targeted.

Bank and finance professionals from all disciplines are facing one international challenge in particular, which is to work together to improve the quality of services while reducing costs, within a framework that is increasingly subject to strict regulations and the use of technology. In order to face the challenge of delivering fully-adapted training programmes, the House of Training uses a quality management method that it calls “Quality Circles”, that brings together professionals and practitioners from the financial sector with shared goals, philosophy and passion for learning. Our quality circles have an intimate knowledge of the real needs in the industry and collaborate actively with the House of Training to integrate this understanding into our programmes.
