ATTACHEMENT

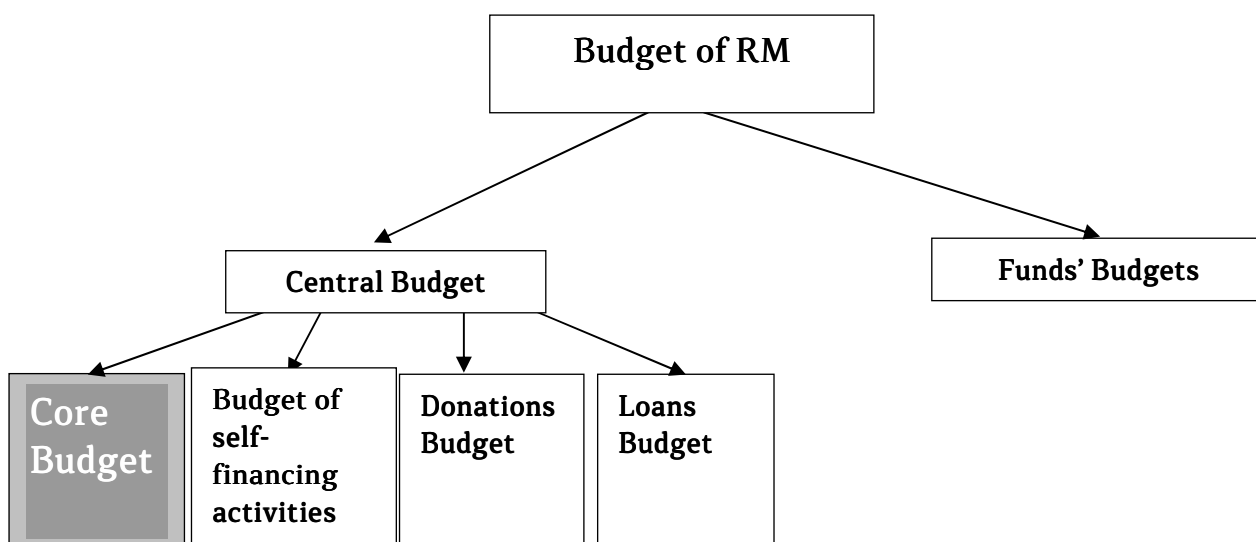

**METHODOLOGY OF FISCAL TABLE OF THE BUDGET OF THE REPUBLIC OF
MACEDONIA**

Methodology used when preparing the fiscal tables (showing the projected, i.e. realized deficit or surplus), i.e. showing revenues and expenditures **above the line** and inflows (borrowing, privatisation and concession proceeds) and outflows (repayment of debt principal) **below the line** (whereby “line” means line showing deficit/surplus), is according to the IMF Government Finance Statistics Manual (GFS Manual 1986). However, when preparing the balance sheets of the Budget of the Republic of Macedonia, inflows are also shown as revenues, i.e. outflows as expenditures. Principle of balancing, i.e. equalizing revenue (including inflows) and expenditure side (including outflows) is applied on the balance sheets, during the budget planning process. When shown in the fiscal tables, revenues and expenditures are above the line, while inflows and outflows below the line. Difference between revenues and expenditures is equal to surplus or deficit. Surplus, i.e. deficit should be equal to the financing below the line, but with opposite sign. Thus, if there is a deficit (negative sign), there should be financing (positive sign). Financing is obtained as difference between inflows and outflows and net changes in deposits (being actually residual of the three previously mentioned categories: inflows, outflows and deficit/surplus).

As for fiscal tables, net changes in deposits are shown below the line under inflows (shown with “-“ if there is increase in deposits, or with “+“ if there is drawing down of deposits

Methodology

Public debt of the Republic of Macedonia comprises sovereign debt and the debt of public enterprises fully or predominantly owned by the state, debt of municipalities, municipalities in the City of Skopje and the City of Skopje, and the debt of the National Bank of the Republic of Macedonia. Thus, Government of the Republic of Macedonia, municipalities and municipalities in the City of Skopje and the City of Skopje, public enterprises and companies fully or predominantly owned by the state, municipalities, municipalities in the City of Skopje and the City of Skopje, and the National Bank of the Republic of Macedonia can be issuers of public debt.

This definition on public debt is included in the Public Debt Law (Official Gazette of the Republic of Macedonia, nos. 62/2005, 88/2008) and it represents what is known as national methodology for calculating the public debt. According to the modifications and amendments to the Law on Public Debt, methodology for presenting the public debt is harmonized pursuant to the Law on Public Debt and the GFS Methodology, whereby total public debt also includes the debt of the National Bank of the Republic of Macedonia. GFS Methodology is included in the IMF Government Financial Statistics Manual, issued by IMF, and it is often applied methodology to calculate public sector debt.
