PREPARATION COURSE TO THE CERTIFIED INFORMATION SECURITY MANAGER® (CISM®) CERTIFICATION

Dear Madam or Sir,

Digital transformation has continued to accelerate in recent years and the modern world relies on the digital space to get business done. But with the increase in cyberattacks, scams and security breaches, becoming a digitally trustworthy enterprise is important for organizations to enhance reputations, their relationships and brand loyalty with customers.

Digital trust is a necessity in a global economy reliant on ever-increasing connectivity, data use and new innovative technologies. To help financial organizations of its partner countries to advance digital trust so their business can grow and thrive, the House of Training – ATTF, with the support of the **Luxembourg Ministry of Finance**, is willing to assist their professionals to become strategic security leaders by offering them the opportunity to get ready for the **ISACA's Certified Information Security Manager® (CISM®)** exam.

A 4-session **online preparation course** will be delivered on **7, 9, 14 and 16 November 2022** by a representative of ISACA Luxembourg Chapter and selected participants will be offered course material (Review Manual and Review Q/A) as well as a voucher to take the **CISM® exam by the end of 2022**. The exam is computer-based and administered as a remotely proctored exam or at authorized PSI testing centers globally.

The CISM® Certification indicates expertise in information security governance, program development and management, incident management and risk management. It brings credibility, validate commitment to compliance, security and integrity, and ensures alignment between the organization's information security program and its broader goals and objectives.

The programme will be open to 16 participants selected by the House of Training-ATTF and ISACA Experts among candidates from our partner countries. It is designed for those who manage, design, oversee and assess an enterprise's information security function. **Five (5) or more years of experience in information security management** are required so that participants who pass the exam may quickly apply for the certification.

The CISM® exam requiring **long-term preparation and intensive self-study** (the review material will be sent to the participants who will have to study in advance), only **highly motivated** candidates, with a **very good command of English**, should apply. A condition to be selected is also to commit to **take the CISM® exam by 31 December 2022**.

If you have technical expertise and experience in IS/IT security and control, want to make the move from team player to manager, if you are ready to dedicate personal time to add credibility and confidence to your interactions with internal and external stakeholders, peers and regulators, don't miss this opportunity for learning and career growth.

HOUSE OF TRAINING

Join the 48K+ CISM® certification holders and apply now: please fill in the attached application and send it back **by 19 July 2022** to House of Training/ATTF **official Partner in your country**. Please note that only fully completed forms will be considered.

We look forward to receiving your application for this unique opportunity to earn the CISM® certification, which will signal to your employer and peers that you are dedicated to high professional standards, knowledge and skills.

Should you need any further information, do not hesitate to get in touch with us.

Yours sincerely,

Hilda LUTGEN
